

Change in home visit rules

There is a change in my visit schedule because of an illness. The illness can make anyone sick.

Doctors and nurses made new rules to keep us safe and healthy.

I can help by staying at _____ house and my family can help by staying at home.

This might mean I won't see my family for a long time, but I can still talk to them on the phone or computer!

It is okay to feel confused, bored or upset. Doctors and nurses will tell us when it is safe to see family again.

My family still loves me and I love my family. We all have to follow the rules to stay safe and healthy, even though it is hard.

Staff are here to help me. I will do new things and have fun with my staff at my house!
