

Youth Services Integration

In 2021, the Guild school and residential programs were combined under one leadership team to create a 24/7 integrated model of educational care focused on students' quality of life. Since then, we have been working in committees to begin to make that goal reality. Read on to discover some of the work we have accomplished.

Steering Committee

Committee dedicated to ensuring the integration of residential and school departments is focused on students' quality of life. Our priority goals: creating one Guild Framework, improving communication, developing a collaborative, respectful culture, utilizing data, and facilitating the integration process.

Training Work Group

Work group tasked with creating effective onboarding for residential staff in order to support a workforce that feels prepared and successful to interact with our students everyday. Our current focus: obtaining feedback from staff, families, and students on the onboarding experience.

Policy and Practice Portfolio Work Group

Work group tasked with making our daily procedures and protocols easy to access and apply for all residential staff and those staff who collaborate with them. Our current focus: to identify those priority policies and procedures to embed in our new accessible digital guide.

Other departments have joined the movement. The education department, community education department, and program directors have all taken on new projects.

IEP Improvement Project

Community Education Development

Program Director Collaboration

Have an idea? email Annie, Chief Education Officer, at awillis@guildhumanservices.org or Mark, Director of Residential Services, at mboilard@guildhumanservices.org

Coming soon... we can't do our work without input from stakeholders. Soon to be developed advisory committee comprised of parents, students, community members, and rotating groups of staff will support the Steering Committee's work.

Stay tuned for our monthly updates and opportunities for participation.
